

Vintage Lumber's .375" or .5" Reclaimed Flooring options are the hallmark of our commercial and renovation markets. This flooring choice, milled from the same material as our 17mm products within The Vintage Collection, allows for both a nail-down and glue-down installation where subfloor conditions and/or height restrictions may eliminate the use of a standard flooring thickness.

PRODUCT COMPOSITION: All flooring is made of solid wood reclaimed from dismantled antique buildings ranging in age from 50 –200 years old when razed. All lumber is uniformly kiln-dried to 5%-8% moisture content prior to being milled into flooring and then stored in a temperature-controlled warehouse. The flooring is machine milled, but not sanded or finished, into .375' or .5" thick planks with an off-set "floor match" tongue and groove and end-matched in random lengths of 18"-7'. Each board is face graded and will have character markings consistent with their origins, age and grade.

PRODUCT SPECIFICATIONS: All flooring is available in either random widths 3"-6' or all 4". Species available are Reclaimed Oak, Reclaimed Chestnut, Reclaimed Yellow Pine and Reclaimed Hardwood Blend. Prefinishing is also available with a UV-High Abrasion commercial top coat.
