

Prefinished 6" Rustic Cherry

Vintage
Lumber

PRODUCT COMPOSITION: Our Prefinished 6" Rustic Cherry is made of solid wood specifically chosen for both its color and character markings. It is uniformly kiln-dried to 6%-8% moisture content prior to being milled into flooring, then stored in a temperature controlled warehouse. The flooring is machine milled (all four sides), into ¾" thick planks with an off-set "floor match" tongue and groove and end-matched in random lengths of 1'-7'. Each board is face graded and finished with a specially designed UV-Poly-Oil which promotes a low sheen and easy maintenance.

PRODUCT CHARACTERISTICS: American Cherry has historically been prized as both a cabinet and flooring option. Our Prefinished 6" Rustic Cherry makes a dramatic flooring choice that deepens in color with age to a warm reddish brown. It will contain tight, but possibly open knots, varying faint grain patterns, mineral streaks, gum specks, and hairline cracks. The boards originally will primarily be a light tan with a distinctly pink/red hue.
